

# Communication within the group

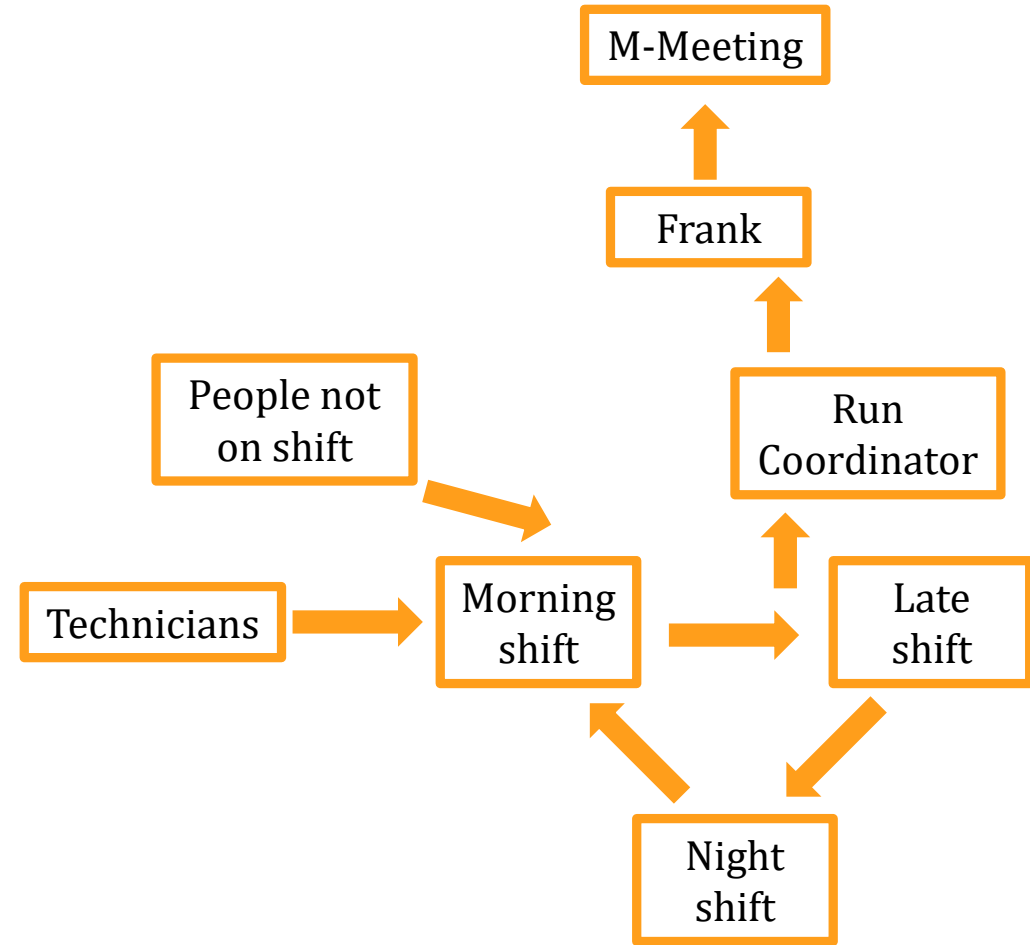

Discussion and brainstorming to improve run-related communication aspects of our work

Raffael Niemczyk  
Zeuthen, 18.03.2021

# Current shift communication

## First order approximation

- > Approximation of information flow at PITZ
- > In detail, differences occur
- > One recent example:
  - > Installation of new YAG screen at H1.Scr1 & resulting issues

# Brainstorm our communication

## Find our demand to communication

- > Discuss pro's and con's of **current** communication
- > Debate necessities of (**future**) communication
  - > What would be **nice to have**?
  - > What is a **must**?
  - > What is **irrelevant**?
- > **Possible extra:** Suggest a solution!
  
- > Have discussion in **breakout rooms**
  - > Enough time for discussion
  - > Take notes
  - > Summary in plenum

Example:

'One should have possibility to split discussion into different threads',  
or  
'People on night shift should have access to it'
