

Minutes of PITZ Physics Seminar, 30.01.2020

Project: PITZ

Participants: A.Pathak , X.K. Li, G. Georgiev, H. Qian, R. Niemczyk, J. Good, M. Gross, H. Shaker, N. Chaisueb, P. Boonpornprasert, T. Weibach, G. Shu, O. Lishilin

Agenda:

- 1) Slice emittance measurement methodology study – R. Niemczyk
- 2)

Results:

- 1) Used quads to improve signal-to-noise and time resolution.
- 2) Plateau in emittance over quad strength.
- 3) Strong quads result in increase in emittance and momentum halo in PS
- 4)

Protocol prepared by G. Georgiev.
