

# For discussion on topic: PITZ operator teachings

The proposal is to organize yearly PITZ operator teachings on following topics:

- Actions to be done in case of a fire alarm.
- How to do tunnel/shaft search correctly (what are the tasks of a search team)?
- What is the purpose of the PITZ radiation safety logbook and how to fill it correctly?
- How to do temporary access?

Open questions:

- Who's duty is to make the teaching?
- How often teaching to be done (1 time per year or per 2 years)?
- Which topic to be included else?
- Which content of the topics?
