Minutes of PITZ Physics Seminar, 01.12.2016

Agenda:
1) Simulation of Self-modulation setup.
2) PWFA
3) Self-modulation
4) Run coordination

Results:
1) Emission simulations with self-modulation parameters: cannot reproduce emission curve.
2)
      a. Description on how to operate the discharge plasma cell.
      b. Description of the measurement program.
3) Description of the measurement program
4) Decision next week to dismount the plasma cell next week or not.

Next steps:

What is to be done ?	By whom ?	Until when?	Done on
Scan solenoid, BSA and try to reproduce beam sizes, use low charge longitudinal profile.	Osip		

Protocol prepared by

….
