

Minutes of RESULTS, PITZ Physics Seminar, 10.11.2016

Project: PITZ

Participants: F.Stephan, M.Krasilnikov, M.Gross, O.Lishilin, Y.Renier,
P.Boonpornprasert, J.Good, X.Li, A.Oppelt, I.Isaev, G.Asova, N.Chaisueb, G. Loisch

1) Agenda: Quantang – beam based gun asymmetry studies.

2) Results:

- a. Quad (normal and skew) strengths evaluated from relative displacements compared to simulation.
- b. Quad strength in the order of $10e-3$ T.

What is to be done?	By whom?	Until when?	Done on
Error analysis	Quantang		

Protocol prepared by Yves
