

Minutes of RESULTS, PITZ Physics Seminar, .11.2015

Project: PITZ

Participants: F. Stephan, M. Krasilnikov, P. Boonpornprasert, H. Huck, J. Good, Q. Zhao, O. Lishilin, G. Loisch, A. Oppelt, D. Richter, M. Gross, T. Rublack, I. Mufty, G. Vashchenko

Agenda:

- 1) Q. Zhao “Beam imaging”
- 2) T. Rublack “Shutdown procedure update”
- 3) T. Rublack “Laser beam line modification”
- 4) AOB

Results:

- 1)
- 2)
- 3) New 4f LBL design is discussed. Technical design needs further development. Energy meter is proposed to be installed after M4. Shutter to be considered.

Next steps:

What is to be done?	By whom?	Until when?	Done on
Check the solenoid calibration => relative change?	QZ		
Larmor angles and scaling to be determined using resoluMeter tool	QZ		
Try to find initial angle offset on VC2	QZ		
Check aspect ratio of the measured grid images	QZ		
Update shutdown procedures according to the discussion	TR		

Protocol prepared by G. Vashchenko
19.11.2015
