

Minutes of RESULTS, PITZ Physics Seminar, 04.06.2015

Project: PITZ

Participants. F. Stephan, F. Tonisch, C. Hernandez-Garcia, Y. Renier, M. Bakr, M. Otevrel, M Krasilnikov, Q. Zhao, M. Gross, H. Huck, G. Asova, J. Good, G. Kourkafas, Q. Zhao, T. Rublack, M. Nozdrin, V. Paramonov.

Agenda:

- 1) F. Tonisch: Teaching: PITZ timing
- 2) Run coordination
- 3) AOB

Results:

- 1) F. Tonisch: Teaching: PITZ timing took place
- 2) Run coordination:
 - Suggestions from the CM concerning the laser beam transport/imaging should be considered during the laser alignment.
 - Next steps: 4.5MW emittance program, TDS, UV stacker usage – would require streak camera ready.
- 3) AOB: Frank:
 - Proposal to shift the XFEL tunnel closure for autumn. Only 3 months for LINAC commissioning. We might be asked to cooperate.
 - LHC: No funding for DESY from Helmholtz society for upgrade the of LHC detectors.
 - Kick-off meeting of Ph.D. students took place; other meetings foreseen, the students are welcome to participate.

Question for the 2nd talk:

Questions:	By whom?		
The fast recovery procedure might/should be implemented to SMAC.	HH+David M.		
Ask Frank Tonisch if the power supply of LEDA dipole has been exchanged	Marek		
Put grid at VC2 position to check the pixel size	Laser		

Protocol prepared by: M. Otevrel
