## Minutes of RESULTS, PITZ Physics Seminar, 20.03.2014

Project: PITZ

Participants: F. Stephan, D.Malyutin, G.Vashchenko , K.Kusolyariyakul, M.Otevrel, I.Isaev, M.Gross, M.Khojoyan, G. Asova, B.Lei, S. Philipp, J. Good, M. Krasilnikov, T. Rublack, G.

Pathak, A. Donat, D. Richter,

## Agenda:

- 1) S. Philipp, M.Gross: PITZ beam line remodeling for the plasma cell
- 2) M. Krasilnikov: PITZ running coordinates

## Messages:

- 1) Talk the problem about the movements: gas leaking
  - There are some helium gas leaking into IGP(99%) and the booster(1%) and rising the pressure. That requires to be pumped the gas at the IGP and booster every 3 days and every 1 year at least, respectively. The gun is OK without pumping.

## **Next steps:**

By whom?	Until when?	Done on
S. Philipp		
	By whom?  S. Philipp	

Protocol prepared by M. Otevrel, 28.06.2012
