

Status report

Review on image processing algorithms used in all PITZ applications

- Videoclient
- EmCalc
- TOMO
- Slice emittance
- MAMA/OMA - momentum analysis

Name Weijia Xiong
PITZ PPS meeting
Zeuthen, 25.07.2013

- Basic ideas;
- Algorithms;
- Inputs & outputs forms;
- Details on programming;

It's always important to know **where we are** and **what we have** before next move. After which, improvements can be made to promote the performance of image process in PITZ applications mentioned before.
